

Electric Vehicle Charging Station (EVCS)

Frequently Asked Questions (FAQ)

1. What is the Electric Vehicle Charging Station (EVCS) Development Programme?

The EVCS Development Programme is an initiative by MARii that provides financial assistance in the form of grants to support the development of electric vehicle (EV) charging infrastructure in Malaysia. The programme aims to accelerate the growth of EV charging networks and support the country's transition towards sustainable mobility.

2. Who is eligible to apply for the EVCS Programme?

The programme is primarily targeted at automotive industry players, particularly Bumiputera companies, who are interested in developing EV charging infrastructure as part of their expansion or investment strategy.

3. What kind of financial support is provided under this programme?

Eligible applicants can receive a matching grant of up to 50% of the cost per EV charging unit, capped at RM50,000 per unit. Each company can receive a maximum total funding of up to RM500,000 subject to approval by the relevant committee.

4. What are the main objectives of the EVCS Programme?

- Accelerate the development of EV charging infrastructure nationwide
- Support Malaysia's Sustainable Development Goals (SDG) agenda
- Indirectly boost EV adoption and sales by improving accessibility to charging facilities

5. How does the EVCS Programme benefit business and the EV ecosystem?

Businesses benefit through reduced capital costs for infrastructure development, while the program also contributes to:

- i.Strengthening Malaysia's EV ecosystem
- ii.Encouraging adoption of environmentally friendly technologies
- iii.Supporting long term growth of the automotive and mobility sector
